Monthly Consumption Mix — DISCOM vs OA

KWH

Your actual energy source mix vs Prolt's recommended distribution — Jan 2026.

Monthly Spend Comparison

WHAT THIS SHOWS

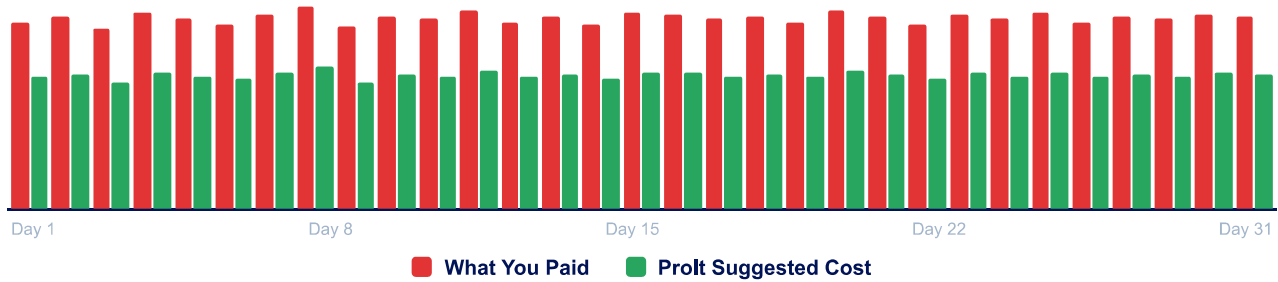

The red bar is what you paid on your current DISCOM-only supply. The green bar is what the same load would cost under Prolt's optimised DISCOM + Open Access mix. The gap between the two is your projected saving of **₹3.67L**.

02 MONTHLY DETAILS — JAN 2026

A day-by-day view of the same month. The first panel shows how much you could save on each day; the two panels below compare how energy was actually purchased against Prolt’s recommended split.

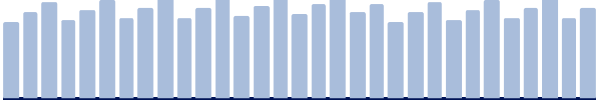

Daily Savings Opportunity — Jan 2026

How much you could save each day

How You Actually Purchased

All energy purchased from DISCOM.

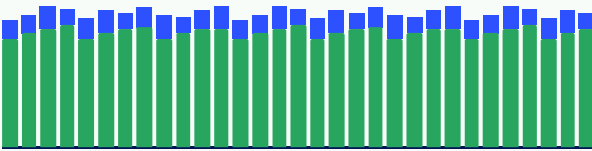

DISCOM Energy

Total Paid: ₹26,133

How You Should Purchase

RECOMMENDED

Prolt's optimal DISCOM + OA mix for savings.

Buy from OA Buy from DISCOM

You'd Pay: ₹18,355 (Save ₹7,778)

Prolt Suggested Daily Breakdown

DAY	TOTAL UNITS	OA UNITS	DISCOM UNITS	YOU PAID	PROLT SUGGESTED	SAVING
Day 1	120	120	0	₹843	₹607	₹236
Day 2	120	120	0	₹843	₹606	₹237
Day 3	120	120	0	₹843	₹612	₹231
Day 4	120	120	0	₹843	₹583	₹260

Showing first 4 days of the month. Full daily breakdown available in your Prolt dashboard.

TERMS USED

DISCOM — the local electricity distribution company you buy power from today.

Open Access (OA) — direct procurement from generators, typically at a lower per-unit cost.
